

NEERAJ DUSA

Hyderabad, India | neerajdusa19@gmail.com | github.com/dusa-neeraj | linkedin.com/in/neeraj-dusa

OBJECTIVE

B.Tech Computer Science (Data Science) undergraduate seeking Software Development Engineer (SDE) internship opportunities. Strong foundation in Python and problem-solving, actively building full-stack development skills using the MERN stack (MongoDB, Express, React, Node.js) and JavaScript. Demonstrated ability to independently design, build, and ship complete end-to-end projects, from data pipelines to deployed web applications.

EDUCATION

B.Tech in Computer Science and Engineering (Data Science Specialization)

Malla Reddy Deemed to be University, Hyderabad | 2nd Year (3rd Semester), Ongoing

TECHNICAL SKILLS

- **Languages:** Python, Java (OOP - inheritance, method overriding), JavaScript (ES6+, async JS)
- **Web Development (in progress):** MERN Stack fundamentals - MongoDB, Express.js, React, Node.js
- **Data Science / Libraries:** NumPy, Pandas, scikit-learn
- **Data Structures & Algorithms:** Arrays, Two Pointers, Prefix Sum, core DSA concepts (Striver's A2Z sheet)
- **Tools & Platforms:** Git, GitHub, VS Code, Google Colab, Streamlit, SQLite

PROJECTS

IPL Win Predictor | Python, Pandas, SQLite, scikit-learn, Streamlit

- Built an end-to-end machine learning pipeline predicting live IPL match win probabilities
- Performed data cleaning and exploratory data analysis (EDA) on historical IPL match data using Pandas
- Queried and structured match data using SQL (SQLite) and trained a win-probability model with scikit-learn
- Deployed an interactive web application using Streamlit for real-time predictions

ATM Banking System | Python (OOP)

- Built a console-based ATM simulation applying core OOP concepts (classes, encapsulation)
- Implemented core banking operations including balance inquiry, cash deposit, withdrawal, and PIN validation

Number Guessing Game | Python

- Developed an interactive console game using randomized number generation and conditional logic
- Added attempt tracking and input validation to handle user errors gracefully

CERTIFICATIONS

- HackerRank - Python (Basic) Certification
- Reliance Foundation - Data Science for Everyone
